### Your Sun Sign Forecast February 2013

#### Aries 20 March – 19 April

This month is a great time to join with a group, start a joint project, or to make new alliances with friends. Be aware that sudden decisions will have long term consequences. How much commitment is involved? How responsible do you want to be? It easy to say "yes", but much harder to back away.

#### Taurus 20 April – 20 May

With the planet of luck and the New Moon entering your zone of work and status there is wonderful potential to be recognized for what you are doing. If you don't like what you are doing, then now is the time to change it. You will spend more than you wish, so make sure it's planned, and not a surprise.

#### Gemini 21 May – 20 June

Who wants to get away? You! If the planets say so, then the least you can do is plan a holiday. Seeing new horizons and learning something new will inspire you.

Especially when you and the boss don't see eye to eye. I suggest being patient, as it will take a

### It's Time!! To see what's happening in the stars for you.

Call for your reading. In my work I will always use both Astrology and Palmistry. The Stars show your potential, and your hands show how you "grab" hold of life!

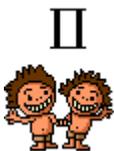

Through them we look to the present and to the future.

**Moe at Gippsdown Heritage Village on the Highway at Moe** in the mornings by appointment. I even do 8am "breakfast" readings. Mind you; no breakfast is provided, but the Gippsdown Cafeteria does coffee! ☺

few weeks for them to sort out what they want you to do.

### **Cancer** 21 June – 21 July

Look beneath the surface. What is really going on? Maybe you don't want to find out. But now is the time to lift the lid on murky business. The knowledge you gain goes back a long time, even into old family issues. Others may have forgotten. The question is; do you need to understand and keep it to yourself; or not?

### **Leo** 22 July – 22 Aug

What a great month for love and relationships to flourish. Plan a romantic time with a loved one. Or let new relationships develop. You want to reach out to people and make connections. Friends or work colleagues are struggling with something hidden. It may be something they would rather not know. Help them get in touch with the people who can assist.

### **Virgo** 23 Aug – 22 Sep

There is a great potential to let tensions spoil your month. The warrior planet, Mars, enters your relationship zone and it will be too easy to argue, rather than negotiate, differences. They have their own troubles with work and they don't know that they don't know! So they need to wait another month before making decisions. Next month is better.

### **Libra** 23 Sep – 22 Oct

There is a struggle between having a good time, and your sense of responsibility. So don't be hassled; do both! On some occasions kick up your heels and celebrate being alive. Let your inner child have some fun and that could include having fun with actual kids. And then work at being responsible. Also tell those you hire what you expect of them.

### **Scorpio** 23 Oct – 21 Nov

This is a month for nesting at home. That's right nesting; not resting. Do like the birds do and fluff up your nest, make it more comfortable,

## **Birthday Greetings** go out to

### **Aquarius** 20 Jan to 18 Feb

Hell, there are no rules here - we're trying to accomplish something." Thomas Edison, Aquarian inventor

Thank you to the Aquarian who showed me how to be stubborn in an ingenious manner. And it worked!

### **Pisces** 19 Feb to 20 March

"It always amazes me to think that every house on every street is full of so many stories; so many triumphs and tragedies, and all we see are yards and driveways."

Glenn Close, Piscean actor.

Thank you to the Pisceans who showed me that loving and working their business can be hard work, but is also a sacred and creative role.

put in some nice finishing touches and settled down to be comfortable. The young people in your life will be touchy about sensitive issues. So decide if you want go deep, or keep it light and simple.

**Sagittarius 22 Nov – 20 Dec**

If there are family tensions then I suggest talking with your brothers and sisters as future harmony can be gained by working together. Don't lose, or waste the connection. If need be, forgive, forget and love all the family. Even if there are no tensions, then ask them for advice. Your partner's advice will be different. Which do you take?

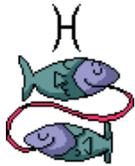

**Capricorn 21 Dec – 19 Jan**

A good idea, or a new start, can prove to be a valuable one. Follow your inspiration. There is good possibility of a lucky break with money. And a new way of managing money can also help. Some decisions can lead to unexpected duties and responsibility, so leave an opening to change your mind.

**Aquarius 20 Jan – 17 Feb**

With Venus the goddess of love entering your sign you can attract what you want. Better decide what that is! Have a clear picture of your goals, focus on positive thoughts and stop thinking about the negative things. Thoughts have the power to attract. Enjoy yourself but be careful you don't "over" spend on having a good time.

**Pisces 18 Feb – 19 March**

Energy is flooding into you. Be activated, use the adrenalin. If you don't use it; it will use you! The result could be tensions and drama. But focus on the positive side of having energy. What would you like to achieve? A spring clean, a new project completed, a new one started. It's all possible!

## Chinese New Year

Feb 10<sup>th</sup> heralds the beginning of the year of the Water Snake. This suggests a year of mystery and transformation. The last time we had a year of the Water Snake was in the mid 50's.

On the surface life appear to be staunchly conservative, but a deep upwelling of change was about to begin in the 60's.

## What's that in the sky?

To get you bearings you only need to remember that the sun rises in the east, and sets in the west.

### For all you night owls

Jupiter is still with us each evening. He is the brightest star high in the northern sky. Though the month he moves more and more to the west. Look for Aldebaran above and the cluster of stars known as the Pleiades, or Seven Sisters, to the left. Let the Moon be your guide when she will be next to Jupiter on 18<sup>th</sup> Feb.

The saucepan, or belt and sword of Orion, is high overhead. And the Southern Cross is lying on its side in the South. Look at the two bright "pointer" stars show will show you the way

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again. Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life. Enjoy the ride!

to the Cross. Navigators have used these for hundreds, if not thousands, of years to find the position of the south celestial pole.

### For all you early birds

Saturn, while difficult to see with the naked eye, will be next to the Moon on the 4<sup>th</sup> February. Look high overhead and try good binoculars or a small telescope to see his rings. Even if you see a bulge they are amazing, and show us that there really are planets and stars out there. It's a big universe! We welcome back the Scorpion who will not far away in the east. The reddish star is Antares and the Moon will be on the head of the Scorpion on the 5<sup>th</sup> February. The pointer stars will be showing us the Sothern Cross which has risen high in the heavens. The Sothern Cross is significant because here in our part of the world we can see it all night long. It's always there calling us safely home.

Let yourself be awed!!
