## Your Sun Sign Astrology Forecast September 2013

### Aries 20 March – 19 April

Are you feeling repressed when you are stopped from doing something you like to do! Relax, it won't last long. And it may be for a good reason. Rash action leads to trouble, while success lies in patience and persistence. Young people may have something they would rather keep to themselves.

### Taurus 20 April – 20 May

Your loved ones have definite opinions on what they want to do, especially round the home. Perhaps they want to move or renovate. It needs to be re-discussed. Venus, the goddess of love, then enters your relationship zone so you will find a harmonious answer, as well as delight in the company of other people.

### Gemini 21 May – 20 June

This is a difficult month for communication, both in being heard, and in making sense of what is said to you. It's all such rush; so let yourself slow down. I suggest you use the gentle art of writing, as this is where you will excel this month. And regenerate your batteries by spending time at home.

### Cancer 21 June – 22 July

Working hard without enjoyment? Young people being a hassle? I think you will indulge in a regretful impulsive expenditure

## Birthday Greetings go out to

### Virgo 23 Aug – 22 Sep

"Trust in Allah. But tie up your camel." Arab proverb

Thank you to the Virgo who showed me that even a simple plan (scribbled on a paper towel) holds the inspirational key to success.

### Libra 23 Sep – 22 Oct

"Persuasion is the art of letting someone else have your way." Annie Gottlieb

Thank you to the Librian who tactfully demonstrated that style, refinement and self-respect meant less, not more.

**Happy Birthday!**

Spring has sprung, the grass is riz, I wonder where the birdies is?

in order to make you feel good about yourself. Tell me later if it worked or not. But I bet that the pleasant feelings are only fleeting. Instead ask yourself; what do I truly value?

**Leo** 23 July – 22 Aug

What a powerful month! Disciplined energy, determination and great communication skills are yours for the asking. Work with it and use it well. If you don't use it, life will bring you problems to solve. You have the driving energy to make anything happen. So grab hold of a handy tool, and get to work.

**Virgo** 23 Aug – 22 Sep

So much happening, but words fail you. Usually quite eloquent, you almost stumble over what to say. The more emotional it is; the more trouble you have explaining. I suggest writing it down on paper. Not text or SMS as I promise it will be misunderstood! If you slow down the words; communication will flow.

**Libra** 23 Sep – 22 Oct

This begins a time of easy and insightful communication, and a month that will remind you to be careful with your money. Everything you value deserves to be respected and taken care of, including people, pets and possessions. Take care, then watch them grow. Some information that you needed is now coming to you.

**Scorpio** 23 Oct – 21 Nov

Life is currently a serious enterprise and people at work are making it more and more serious! But you are able to sparkle and achieve that breakthrough just when you thought it was over. You will learn that victory is so much sweeter when you come from behind. Smile when you know you have achieved a goal.

**Sagittarius** 22 Nov – 21 Dec

You will be hungry to expand your knowledge and ask questions. This can lead

to a need to defend your beliefs. That's OK, but don't bite off more than you can chew. Ask yourself; am I really being challenged, or am I trying to prove myself based on something that happened in the past.

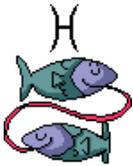

### Capricorn 22 Dec – 19 Jan

Whatever you share with a group of people will be a focus of strain. It may be time, or it may be resources. Your time and their time are both valuable assets. And be aware that the group has something to offer you. So perhaps you need to unbend, then they will bend.

### Aquarius 20 Jan – 18 Feb

You may be about to forget what the definition of "compromise" is? Oh dear. This can lead to friction because you really want to step up and take charge. Use this energy in a creative manner and fight for what is worthwhile. Get legal advice if necessary.

### Pisces 19 Feb – 20 March

What a month. There is work to be done and you are the one to do it. Don't wait for somebody else; do it yourself. Your energy levels are up to it. In fact, please come around and clean out my garage! ☺ This is also a great time to cut out bad habits and become healthier.

Did you know that the Sun moves into the 12 signs of the zodiac on *slightly* different dates each year. If you are born close to the border of two signs then you are on the cusp and you are a blend of the two sun signs. The dates here are the 2012 Sun Ingress dates for Australia. Source is Solar Fire from Esoteric Technologies.

### Quote of the Month:

Take the first step in faith. You don't have to see the whole staircase, just take the first step.  
Martin Luther King Jr.

## 3 Steps that WILL change your day

1. As you wake up, bend your lips into a smile. Then smile from the heart.
2. Lie there and say thank you for the things that were good yesterday. Keep smiling.
3. Imagine your day as a good one. E.g. work is great, the kids are behaving, tasks are happening easily.

Then rise and have a beautiful day.

Go on; try it. What have you got to lose?

## News from the Stars

5<sup>th</sup> Sep New Moon in Virgo

9<sup>th</sup> Sep Mars in Leo square Saturn in Scorpio

9<sup>th</sup> Sep Mercury enters Libra

11<sup>th</sup> Sep Venus enters Scorpio

19<sup>th</sup> Sep Full Moon in Pisces

21<sup>st</sup> Sep Pluto turns direct in Capricorn

23<sup>rd</sup> Sep Sun enters Libra on the Spring Equinox

29<sup>th</sup> Sep Mercury enters Scorpio

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again.

Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life. Enjoy the ride!

## What's that in the sky? September 2013

To be amazed by the heavens, first get your bearings and note that the sun rises in the east, sets in the west and the warmest side of the house is north. ☺

### For all you night owls

Venus is the brilliant Evening Star and Saturn is a small creamy colored light. He is roughly an open hand span higher than Venus. If you watch the west over the early evening, Venus will set then Saturn. Let the Moon be your guide for a beautiful sign when she passes on the 8<sup>th</sup> and 9<sup>th</sup> September. A conjunction occurs with Venus and Saturn on the 18<sup>th</sup> September. They will be as close as they can possibly be. After this conjunction they swap places and Saturn will follow the Sun down into the horizon before Venus.

## Spring Equinox

At the equinox the Sun is directly overhead at the equator. It will rise due east and set due west. That means that both the northern and southern hemispheres get nearly an equal amount of night and daylight hours. Equinox means equal.

"Our" Map ☺

## Gossip Corner

Comet ISON will appear around November 29<sup>th</sup>

This comet is travelling very close to the Sun. Here in the Southern Hemisphere it will be visible low in the east just before sunrise. Some astronomers say it will be easy to see especially if it has a tail which will be pointing upwards away from the Sun. Other astronomers say it will be barely visible. But I would look up just in case you miss the sight of your life! Please don't look directly at the Sun or you will be blinded. Look nearby for the comet trail. Or not, as the case might be. ☺

The ancients saw this as the Goddess uniting with the King, supporting him and placing him a place of power.

The magnificent Scorpion will be seen high in the evening sky. The Moon passes by Antares, the reddish star in the head of the Scorpion, on the 11<sup>th</sup> and 12<sup>th</sup> September.

Look to the south to see the Southern Cross is on its side below the two Pointer Stars. It may be hard to see if hills or trees obstruct your view.

### For all you early birds

Jupiter is the bright light in the predawn sky. Let the Moon be your guide as she passes close by on the 1<sup>st</sup> September and also the 28<sup>th</sup> September. A little lower than Jupiter is the reddish light of Mars, and the Moon will be your guide when she is close to him on the 2<sup>nd</sup> and 3<sup>rd</sup> September. Both Mars and Jupiter will be getting higher and higher in the sky during the Month. More to the north is the cluster of stars known as the Pleiades, or the Seven Sisters, in the heart of Taurus, and Aldebaran in the eye of Taurus the Bull. Let the Moon be your guide when she is between them on the 25<sup>th</sup> September.

Further to the east is what we call the Saucepan. Try and imagine the base of the saucepan as the belt of the great warrior Orion, and the handle his sword hanging from the belt. To our eyes he will be upside down. But to our eyes he will always be "the saucepan". What a letdown for a great warrior rewarded by the ancient gods by being put into the heavens!
