To each and every one of you; look at your hands and know that you are unique, and look at the stars and know that you are part of something greater than yourself.

Your Sun Sign Forecast for November

Aries 21 March – 19 April

Wow, watch out for the fireworks at work! Duck and run for cover as it's a good time to be somewhere else. So pack up your bags and go see something new and perhaps travel, or undertake a course of study in your favorite topic. Get legal or financial advice instead of worrying about the future.

Taurus 20 April – 20 May

Loved ones will bring you a fresh perspective, if you let them, and especially when you look deep into your feelings and decide to get rid of old worn out ideas or behaviors. Let go, say yes and be open and generous to what is offered and then a deeper intimacy and sharing can happen.

Gemini 21 May – 20 June

Get ready as your social life is about to get very busy from the middle of the month. So tick a few things off the to-do list, have a trim or shave (or both) and be spacious with people. When you listen, and I mean really "listen"; they will open up to you. You are in counselor mode.

Cancer 21 June – 22 July

Tensions, assumptions and misunderstanding can easily happen this month. At the very least there is a sense of awkwardness, at the worst there can be arguments. Satisfaction can come from involvement in a helping or volunteer role or devoting yourself to starting healthy activities and getting rid of unhealthy ones.

Leo 23 July – 22 Aug

Have you had enough rest time? If not then put your feet

Its time to see what's happening for you.

In my work I will always use both Astrology and Palmistry. The Stars show your potential and your hands show how you grab **hold of life**. **Through them we look to your strengths, especially now and** to the future, and to see what to avoid, and what to enjoy.

Birthday Greetings go out to

Scorpio 24 Oct – 22 Nov

"There are a thousand hacking at the branches of a problem to one who is striking at the root".

Henry Thoreau

Thank you to the Scorpio who taught me to look deeper into meaning, causes and the resultant consequences.

Sagittarius 23 Nov – 21 Dec

"Nurture your mind with great thoughts; for you will never go any higher than you think". Benjamin Disraeli

Thank you to the Sagittarian who shows me how to look for the inherent truth in any person, action or project. If it's not there; neither are they.

up now, as later this month its activation time again. There will be things to do, celebrations to enjoy, children to laugh at...or to worry about, new hairstyles to parade, and a new creative spirit to inspire you to take risks and move beyond your security zone.

Virgo 23 Aug – 22 Sep

It's a perfect month to put plans into action and to make decisions. You are seeing into the future and thinking for the long term instead of mere details as usual. But keep your feet firmly based on the here-and-now, for improving your home, and your family life, will soon require your attention.

Libra 23 Sep – 22 Oct

Have a quick look at your finances to reassure, or to scare yourself, then be prepared to be light on your feet. Nothing will be settled, ideas will flood in and need discussion, and you could be on the move so often that your head will spin. Keep on asking questions and soak it all in. A quiet time will come....eventually.

Scorpio 23 Oct – 21 Nov

You do have a point to make but beware as this month you can come across as argumentative or belligerent. Your intentions may be honorable but it's the perception of others that counts. This is a perfect time to get finances sorted out, to reorganize loans, or to combine and conquer debts.

Sagittarius 22 Nov – 21 Dec

Later this month is your time to soar, to take the actions you know need taking and to start something new. Don't wait. Now is the time as you will magnetically attract people, events and opportunities to yourself. Don't let temporary money hassles get in your way as you will manage just perfectly.

Capricorn 22 Dec – 19 Jan

Use the energy given to you and use it wisely, with direction and with specific outcomes in mind. It's your choice whether you achieve a set of goals, or to go-off like an unmanned fire hose. Direction and focus is important and when you need to relax I suggest you find some quiet time in your favorite sacred space.

First Quote of the Month:

“Let yourself be silently drawn by the strange pull of what you really love. It will not lead you astray”.

News from the Stars

7th Nov Full Moon in Taurus
9th Nov Mercury enters Scorpio
11th Nov Mars conjunct Pluto
16th Nov Neptune turns direct
17th Nov Venus enters Sagittarius
22nd Nov New Moon in Sagittarius
22nd Nov Sun enters Sagittarius
28th Nov Mercury enters Sagittarius

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again. Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life. Enjoy the ride!

What's that in the sky this month?

To be amazed by the heavens, first get your bearings and note that the sun rises in the east, sets in the west and the warmest side of the house is north. ☺

For all you night owls

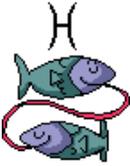

There is not much to be seen with the planets this month so let yourself admire the stars. If you are away from city lights look for the concentration of stars making up the beautiful Milky Way arching across the heavens. This is the spiral arm of our galaxy. The ancients believed it was the breast milk of the great goddess spurting out as she gave birth to the universe.

Mars is low in western sky, but as he is the same colour and appears the same size as Antares (in the

Aquarius 20 Jan – 18 Feb

You are about to take your ideas or your work into the wider world, into groups, into sports, or into any gathering of like-minded people. Your input is needed and what you know will be useful to the needs and aims of the group. So if you share your knowledge and speak up, they will love it.

Pisces 19 Feb – 20 March

Have you already planned a holiday? I bet you are imaging yourself in far better surroundings. Get there quickly, as later this month work will be demanding a big slice of your time and your energy. There will be opportunities for you to shine and have your skills appreciated.

Did you know that the Sun moves into the 12 signs of the zodiac on *slightly* different dates each year. If you are born close to the border of two signs then you are on the cusp and you are a blend of the two sun signs. The dates here are the 2012 Sun Ingress dates for Australia. Source is Solar Fire from Esoteric Technologies.

Second Quote of the Month:

This was too good to leave out ☺

“Between two evils I always pick the one I never tried before”. Mae West

Recipe for Happiness

Wake up and before you open your eyes, smile... yes move those endorphin producing facial muscles; and smile.

Say “thank you” to the whole universe.

Smile again ☺

See in your mind’s eye the day’s activities and imagine them unfolding with ease and harmony.

Enjoy the ride, with love from me.

Moon Gardening is over the page...

head of the Scorpion) you may get the two confused. The Scorpion with Antares will set first with Mars about 2- 3 hand widths behind. Have a look at Mars when he will be with Moon on the 26th Nov.

As the Scorpion sets; Taurus the Bull is rising. These constellations are directly opposite each other, so during the very late evening you can turn around to the east and see Taurus rising. The best sight will be soooo late that you may as well go to bed and get up early to see him in the morning. The Southern Cross is very low and upside down. If you cannot find the Cross then look for the two prominent Pointer Stars a little to the right of the Cross and these will always show you up the way home.

For all you early birds

Jupiter high in the east and will be with the Moon on the 15th November. Directly to the north is Aldebaran in the head of Taurus the Bull with the beautiful Pleiades a little to the lower left. The Saucepan, also known as Orion’s belt, is directly overhead. All the other visible planets are snuggled around the Sun and hence invisible to us.

Ancient Moon Gardening

Gazing out the window I can see the veggie patch and this month the herbs, broad beans and rhubarb are prolific. The gooseberries are nearly ready, the raspberries are taking over the world, and the kale and spinach are going to seed; while the strawberries are slow to take off.

We live in a wonderful part of this gorgeous planet and I have just returned from touring around the beaches and stunning wildflowers of WA. Thank you universe! As a result the tomatoes and basil are only just going in.

Hmm I ask myself... what else I will plant. Ahh the joys of decision making. 😊
