To each and every one of you; look at your hands and know that you are unique, and look at the stars and know that you are part of something greater than yourself.

Your Sun Sign Astrology Forecast for July 2015

Aries 21 March – 19 April

To achieve the freedom you want all you have to do is stay away from battles you cannot win. Or become a peace keeper (ha... Aries .. not likely!). You are not going to change the outcome affecting others even if you get involved; so try and learn a new skill as a peacekeeper, or stay on the fringes.

Taurus 20 April – 20 May

Time at home leads to good opportunities with family. Once you get out into the world there is a tendency to become part of debates or angry discussions about beliefs. There is not just one right way of seeing things; rather there are many. Let others take different view and you all still get to the final goal post.

Gemini 21 May – 20 June

You still have a gift in saying just the right thing at just the right time. Now use it to get yourself out of bad debts or into a low interest rate increasing in value good investment. This means putting money into the long term and not for immediate gratification. There is physical as well as emotional debt. Which is yours?

Cancer 22 June – 22 July

Assets will increase, especially if you keep on working diligently and stay focused on what you are doing. The harder you work the luckier you will get. Other people will expect your attention and may feel left-out if ignored so be aware of upsetting them, especially mid-month. Spend time talking and all misunderstanding will ease.

Leo 23 July – 22 Aug

The stars are smiling on you so accept with gratitude what is given as it will turn out to be the right thing. Old health concerns can re-surface; probably because you have been overdoing it! Include your body in all that you take care of. Do you put good fuel in the car? Well; put good food in you!

Virgo 23 Aug – 22 Sep

All is still not being revealed which makes this a frustrating time. Be patient and bide your time and you will get a hint of what is to come, but only a hint. This hint will eventually grow and bring the

It's time to see what's happening for you.

In my work I will always use both Astrology and Palmistry. The Stars show your potential and your hands show how you grab **hold of life. Through them we look to your strengths, especially now and** to the future, and to see what to avoid, and what to enjoy.

Cancer 22 June 22 – 22 July

"What you are speaks so loudly, I cannot hear what you are saying".

Ralph Waldo Emerson

best later but for now let friends or groups help you relax. A hummingbird works frantically but does it look stressed to you?

♎ Libra 23 Sep – 23 Oct

Your loved ones are inspired to make changes and even if you don't think so at the start, they will benefit you both. Relationships can become a series of mundane habits. It's time to rewrite the rules. A stressful or complicated work life will not help if you take the tensions from the outer world back home.

♏ Scorpio 24 Oct – 21 Nov

Lady luck is smiling on you in regards to work recognition and opportunities. You have status and will be applauded for what you do. Higher authorities are reluctant to admit it openly but will still allow you to initiate changes or to ask for better work conditions especially when you let them know that you still want to learn.

♐ Sagittarius 23 Nov – 21 Dec

Children or young people in your life will have a breakthrough with following advice, perhaps legal. To celebrate they will want freedom. Why not join them? Your own money concerns will rear their head but let it go, as good vibes are coming to help you get the rewards and recognition you deserve.

♑ Capricorn 22 Dec – 20 Jan

This is a time for personal change but keep your attention focused on relationships because if you ignore, or pretend any issues will vanish; you are in for a doozie of a month. Get involved, start talking and start moving. If you are doing something active and energetic together then it will be a great month, so go for long walks or keep busy.

♒ Aquarius 21 Jan – 18 Feb

Friends and loved ones will be getting what they have spent a long time thinking about. This can be wonderful as it teaches us that our thoughts create our reality. This is not without consequences.... as for example; wanting to win tattsлото to get out of debt..... This is really focusing on debt and voila... more debt comes.

♓ Pisces 19 Feb – 20 March

You already know it's time to plug the hole. A financial plan includes what to use, what to build for the future, and what to give freely. A soul plan includes what to use, what to build for the future and what to give freely. Increased enjoyment and pleasure comes when you have both plans in place.

Did you know that the Sun moves into the 12 signs of the zodiac on *slightly* different dates each year. If you are born close to the

Thank you to the Cancerian who shows me to listen to the music of the heavens rather than trying to intellectualize it.

♌ Leo 23 July to 22 Aug

"The only way to make sense out of change is to plunge into it, move with it, and join the dance".

Alan Watts

Thank you to the Leo who reminds me that change is to be expected and welcomed; even when I am trying to intellectualize it.

To both of you; This little Virgo has abandoned the notion of intellectualizing and torn up the planning spreadsheet! ☺ Love you. xx

News from the Stars

1st July Venus next to Jupiter

2nd July Full Moon in Capricorn at 12.19pm

9th July Mercury enters Cancer

16th July New Moon in Cancer at 11.24am

16th July Mars and Mercury opposite Pluto

19th July Venus enters Virgo

23rd July Sun and Mercury enters Leo

25th July Venus turns retrograde

26th July Uranus turns retrograde

31st July Full Moon in Aquarius at 8.42pm

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again.

Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life. Enjoy the ride!

Thank You to those that keep me healthy!

What's that in the sky? July 2015

To be amazed by the heavens, first get your bearings and note that the sun rises in the east, sets in the west and the warmest side of the house is north. ☺

This month's darkest night is the New Moon on the 16th July. The Full Moon is on the 2nd July and again on the 31st with what is known as a Blue Moon. It's not really blue, it means that it is a rare event as in the old saying... "once in a blue moon". Originally it was attributed to the fourth Full Moon in a season but now most people know it as the second Full Moon in a month.

For all you night owls

I had an Opps, slip of the finger, moment last month, when I said that Jupiter and Venus kiss on the 20th June; for it really happens on the 30th June (and also the 1st July). So pop outside tonight see them at their closest. They will spend the month together and are easy to spot just after sunset on the western horizon.

They are the lovers celebrating the joy of life and bringing happiness to all. Throughout the month they move closer to the horizon until they disappear into the setting sun's glare. The Moon joins them on the 18th and 19th July and this would be the perfect time for a party or celebration. The bright star a little higher is Regulus in the heart of Leo the Lion.

Saturn is high overhead with the dramatic Scorpion not far behind. Let the Moon be your guide when she passes close to Saturn on the 26th July. Look to the south to see the Pointer stars "pointing" to the Southern Cross who is easily showing us the way home; no matter where we are. Nearby is the Coalsack Nebula which is known to indigenous people as the Emu. Imagine it with its legs stretched out far behind. The Emu is only visible in late April and early May, which is also when emus lay their eggs. This star story tells us when to go out and get highly nutritious emu eggs for dinner but I prefer to do my hunting from the chook house! ☺

For all you early birds

There are no planets visible in the morning's heavens. Even the Southern Cross is hanging low and upside down. I suggest staying in bed and my sympathy goes to those who must have an early start, but at least there are always stars twinkling just for you, even if you don't know their names or their stories. ☺

Recipe for Happiness

Wake up and before you open your eyes, smile... yes move those endorphin producing facial muscles; and smile.

Say "thank you" and give gratitude to the whole universe.

Smile again ☺

See in your mind's eye the day's activities and imagine them unfolding with ease and harmony.

Quote of the Month:

Where are you in the 4 stages of learning about life?

Hint... Don't speed read! Give yourself the gift of time to think about it.

Hint... Pick a specific life topic/experience and think about it again.

1. You don't know you know Unconscious incompetence
2. You know what you don't know. The Student. Conscious incompetence
3. You know that you know Conscious competence. The courageous teacher
4. You don't know you know it. The Natural Teacher

Ancient Moon Gardening

Gazing out the window I can see the veggie patch and this month the broad beans are the feature and growing merrily. I am munching on the tips... so tasty and it nibbling means they grow shorter with more branches so I don't need to stake them.

I must also tell you about the battleground between me and the birds for ownership of the pea seeds... dash it... those guys are getting smarter. A perfect Moon planting time does not help with birds!

I had a merry time pruning the roses at the perfect time to prune for growth with gloves that come to my armpit's..... for the first time I did not drip blood when I had finished!!
