International Stars Wars Day...4th May

May The Fourth Be With You

Yes its Geeks day; celebrate and smile with me!
It's also Mother's Day month, Beltane and Wesac.

Scroll for more info.

To each and every one of you; look at the earth and know that you are supported, look at your hands and know that you are unique, and look at the stars and know that you are part of something greater than yourself.

Your Sun Sign Astrology Forecast May 2016

Aries 20 March – 19 April

As long as you review and refresh your attitude to your finances, you will find a windfall. Spend this month asking yourself... "what do I need to do.... to be where I want to be?" Also be prepared to learn a hard lesson in rules and law which reminds you again to do.... what you know you are supposed to do!

Taurus 20 April – 20 May

This is a month to reflect, to ponder, to plan but not yet begin to start anything. Study all possibilities then let a new creative impulse start working within you before you share it with the outside world. This gives you time to alter and adjust. Stop being fearful of your own creative power. It's time to start growing.

Gemini 21 May – 20 June

For most of this month you desire peace. If it's attainable, then it's a perfect month but if family and working situations are chaotic then you will feel under strain. It's OK to say "No, I need a moment, an hour, or a day to myself". Your time to shine will be later in the month.

Cancer 21 June – 21 July

Now it's time to make decisions! You will also have the ability to reach out and communicate with anybody, especially in groups. The shy amongst you will discover a new talent for speaking; the extroverts will be eloquent and convincing. Prepare to negotiate a workplace agreement and aim for a win-win outcome.

Leo 22 July – 22 Aug

Work, be it paid or unpaid, is not going ahead as you imagine but the omens are good for the long term. Right now you are supposed to go over and over again to make sure of everything. Stay confident as you are making great progress and people will notice. Money spent on fun things, won't be fun and won't help.

Virgo 23 Aug – 22 Sep

You want to surge ahead but there is still something to learn, and information which is important that you must discover. So ask questions, make contact with people who have the knowledge, use google and act like an investigator. Home and family soon need attention but don't forget your own journey as they could distract you.

Libra 23 Sep – 22 Oct

Going inward and discovering your shadow side is confronting and scary but it is also a way to peace and joy. Life circumstances may have caused self-judgement and behavior patterns you no longer need. Take off the old skin and be new again. You can stand tall in the purity of being you, not who somebody else thinks you are.

Scorpio 23 Oct – 21 Nov

Let loved ones be dithering and indecisive as they will soon have new opportunities and decisions to make and this is the time they need to weigh up the pros and cons. Worrying that future goals will be blocked by financial constraints actually guaranteed that they will! Instead think about budgets and savings plans to ensure that you succeed.

Sagittarius 22 Nov – 20 Dec

At last the future gets clearer and all the hard work and concentration is allowing you to head for your dreams. It still requires effort but this is the finishing work, not the starting nor the maintenance... but the final achievement phase of a recent cycle. Are you allowing yourself to think about the next few years?

Capricorn 21 Dec – 19 Jan

Are you stressed or restless? The solution is to bring a bit of “varoom” into your life and go forth where you have not yet ventured? Let yourself enjoy doing something rash or different. I know that’s hard for a most Capricorns but let yourself go. Seriousness will soon return so make hay while the sun shines.

Aquarius 20 Jan – 17 Feb

Home life and family is still calling your attention. Its clean-up time which means literally it’s a perfect productive time to get rid of old clutter and make it sparkle. On the personal level; it means that it’s time to clean up your inner journey of the soul. What cobwebs clutter your heart? What pain needs to be thrown out?

Pisces 18 Feb – 19 March

Slow down and think before you talk or act. You see all points of view and loved ones are moving ahead and want you on their side. It’s a perfect time to offer them a different perspective as they struggle with their role and they will welcome your varied ideas as it means more choices; always an exciting prospect..... if they like choices!

Did you know that the Sun moves into the 12 signs of the zodiac on *slightly* different dates each year. If you are born close to the border of two signs then you are on the cusp and you are a blend of the two sun signs. The dates here are the 2015 Sun Ingress dates for Australia. Source is Solar Fire from Esoteric Technologies.

1st May Beltane or May Day

Beltane is a Gaelic festival on the 1st day of summer in the Northern Hemisphere. It is mid-way between the march equinox and June solstice and is also called a cross-quarter day.

In the northern hemisphere this is a time to celebrate the fertility of nature with dancing and festivity as the animals taken out of stables and into the pastures. Festivals were held between villages and romancing was encouraged while dancing around the May Pole. Over in the north; spring has sprung!

Here.... winter is coming!

4th May International Star Wars Day

May the fourth be with you!

Yes I’m a geek. Enough said. ☺

8th May Mother’s Day

Mother’s Day is on the second Sunday in May and to help you gain bonding and reconnection, here are some questions to ask her.

What advice can you share about life, happiness and money?

What has being a mum meant to you?

What are you most proud of?

How would you like to be remembered?

Love her for simply trying.

Forgive her for not being perfect.

22nd May Wesac

This is the Buddhists Holy Day and celebrates the life of the Buddha. It is on the Full Moon in May every year. He was an enlightened man whose teachings are profound. Do yourself a favor and learn one small fact about him and his thoughts.

Quote of the Month:

The Quote.....*"The goose ran across the top of the water hammering its wings and just when it was obviously that nothing was going to happen...then suddenly it did. Fly that is".*

Terry Pratchett.

The lesson I took was.....start doing it!

Another Quote.....*"What they were going to do was impossible but they didn't know that; so they did it anyhow."*
Terry Pratchett.

The lesson I took from the quote..... Don't worry about "how to do it" just do it!

6 Steps to Self-Understanding

I re-found this quote that I had copied into my "little book of life tips".

Ask yourself...

How am I feeling right now?

What is causing me to feel this way?

In what way can this feeling serve me today?

If it could serve me today.... What would that be?

How can I amplify or shift this energy to a place that can serve me?

How am I feeling right now that I'm consciously in control of how my feelings serve me?

It's time to see what's happening for you.

In my work I will always use both Astrology and Palmistry. The Stars show your potential and your hands show how you grab **hold of life. Through them we look to your strengths, especially now and** to the future, and to see what to avoid, and what to enjoy.

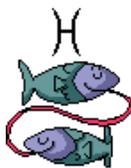

Moe at Gippsdown on the Highway Various weekdays by appointment in the beautiful and peaceful grounds of Gippsdown Heritage Village on the highway at Moe.

Phone readings Send me photos of your hands I will call at a time that suits you.

Birthday Greetings go out to

Taurus 20 April – 20 May

"If people knew how hard I have had to work to gain my mastery, it wouldn't seem wonderful at all."
Michelangelo

Thank you to the Taurean who showed me that if you just work hard enough at something.... you will get it.... and then never show disappointment, only acceptance, when it's less than expected. Then work to improve it!

Gemini 21 May – 20 June

"The less of routine, the more of life" Amos Bronson Alcott

Thank you to the Gemini who showed me that losing curiosity is actually losing part of one's self. Gaining curiosity is like coming back to life.

What am I getting up to? Everything!

Great dates to put in your diary...

Ancient Moon Gardening

Gazing out the window I can see the veggie patch and right now it looks so very bare! The pumpkins have been harvested (Jap and Butternut), the broad beans are planted where the tomatoes used to be and I am ready for more plantings. The eggplants will remain to see if they give another crop next year.

The olive tree received a severe prune and it has taken 3 long years but I have a crop again....it's a small one but a crop nether-the-less. The fig, that I planted to stay small but is determined to be huge, is still giving beautiful figs which the birds have not found. Yippee ☺

The autumn coolness has revived the roses and once more I have their flowers to admire, while the natives are continuing to look gorgeous and feed the bees.

May you continually experience the joy of nature in the coming month.

News from the Stars in May 2016

7th May **New Moon** in Taurus
9th May Jupiter turns direct in Virgo
Lots of Venus trine Jupiter and Merc conjunct Venus
21st May Sun enters Gemini
22nd May **Full Moon** in Sagittarius
22nd May Mercury turns direct in Taurus
24th May Venus enters Gemini
26th May Jupiter in Virgo square Saturn in Sagittarius
27th May Mars enters Scorpio

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again.

Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life. Enjoy the ride!

What's that in the sky? May 2016

To be amazed by the heavens, first get your bearings and note that the sun rises in the east, sets in the west and the warmest side of the house is north. The darkest night is with the New Moon on the 7th May and the brightest night is with the Full Moon on the 22nd May.

For all you night owls

Magnificent Jupiter is high overhead and rules the night skies. The Moon joins him on the 15th May for a very bright night where you could think somebody is shining a light into your bedroom window!

To Jupiter's left is Regulus, in the heart of Leo the Lion, who was killed by Hercules as part of the 12 great Labors. The lion's skin, which could not be pieced by weapons, became Hercules famous cloak.

Mars and Saturn are rising in the east along with Antares located in the head of the Scorpion. The later it gets the higher the planets and Scorpio will rise. The ancients, living in an era of constant tribal wars, would consider these months where the God of War, the Great God and a Scorpion ready to fight, are rising in the evening to be a very ominous warning! The Moon will guide the way to them on the 22nd and 23rd May. Turn around and look south to see the Southern Cross high over the two bright pointer stars.

For all you early birds

If you watched all night you would see Mars, Saturn and Scorpio travel over the heavens and now they are ready to set into the western side of the heavens. The Moon joins them on the 22nd and 23rd May.

By the end of the month Mercury will appear for about 1 hour before dawn close to the eastern horizon but you have to be quick and look closely to see a steady light that is moving faster than the stars behind it.

Turn south to see the Pointer stars and below these you will see the Southern Cross. It may be difficult to see if buildings, lights or hills obscure your vision.
